Catherine Ambrad

Summary

Experienced software developer with a strong foundation in mathematics, Python programming, data analysis, and computational problem-solving.

Skilled in developing efficient software applications, building automation solutions, and applying mathematical and statistical techniques to analyze complex datasets and optimize business processes.

Proficient in object-oriented programming, algorithms, statistical analysis, and scientific computing, with a focus on delivering scalable, reliable, and maintainable solutions.

Passionate about leveraging software engineering, artificial intelligence, and data-driven approaches to solve real-world problems, improve operational efficiency, and support informed decision-making.

Technical Skills

• Python • SQL • Git • Bash • Linux • Jupyter Notebook • VS Code

• NumPy • Pandas • SciPy • Matplotlib • Scikit-learn

• Object-Oriented Programming • Data Structures • Algorithms • Debugging

• Data Analysis • ETL • Data Visualization • Automation • Reporting

• Calculus • Linear Algebra • Statistics • Probability • Numerical Methods

• Optimization • Mathematical Modeling • Scientific Computing • Technical Documentation

Experience

AI Marketing Automation Consultant

SKIDD PH • Angeles, Philippines
05/2020 - 06/2026

- Build automated workflows inside Go-High-Level and other CRM platforms
- Implement AI chatbots for website lead capture and qualification
- Deploy AI voice systems for appointment booking and customer engagement
- Optimize conversion rates through A/B testing and behavioral triggers
- Manage paid traffic sources and integrate them into automated pipelines
- Draft and distribute press releases to increase digital visibility
- Talking Websites + Web Funnel designs

Senior Software Developer

Thinking Machines Data Science • Taguig, Metro Manila
10/2019 - 04/2020

- Designed Python applications for data processing and workflow automation.
- Built reusable mathematical libraries and reporting tools.
- Improved application performance through code optimization.
- Collaborated with engineering teams on scalable software solutions.

Software Engineer

Aboitiz Data Innovation • Metro Manila
03/2018 - 08/2019

- Developed internal Python utilities for analytics and validation.
- Created SQL queries and automated operational reports.
- Maintained Linux-based production applications.
- Performed testing and code reviews.

Python Developer

Stratpoint Technologies • Mandaluyong, Metro Manila
03/2017 - 11/2017

- Implemented data transformation pipelines using Python.
- Developed visualization dashboards for business users.
- Integrated APIs and automated recurring processes.
- Prepared technical documentation.

Education

Computer Science & Data Science

De La Salle University (DLSU) • Manila, Metro Manila
2010 – 2014 Associate's degree in Computer Science & Data Science

Computer Science & Mathematics

University of the Philippines Diliman • Quezon City, Metro Manila
2005 – 2009 Bachelor of Science in Computer Science & Mathematics
