Angeles, Philippines | +639352779865 | catherineregato@gmail.com

Summary

Full-stack software engineer with 6+ years of experience building customer-facing web applications and backend APIs using JavaScript, TypeScript, React, Next.js, Node.js, and relational databases. Skilled in responsive frontend development, REST and GraphQL APIs, database design, CI/CD, and automated testing with Jest and Cypress. Experienced in e-commerce and fintech products, translating business requirements into reliable, maintainable solutions.

Experience

Merche

05/2020 - 07/2024

Backend Developer

Angeles, Philippines

- Built and maintained backend services and RESTful APIs for e-commerce and fintech products using Python, Django, and Flask, supporting multiple client-facing applications.
- Designed RESTful APIs with Django REST Framework, handling authentication, serialization, and permissions for multiple client-facing applications.
- Modeled relational data with Django ORM, writing efficient queries and handling migrations as the schema evolved.
- Built lightweight microservices with Flask for tasks like background processing, internal tools, and third-party integrations where a full framework wasn't needed.
- Implemented authentication and authorization using Django's built-in auth system and JWT-based auth for API endpoints.
- Worked with PostgreSQL as the primary database, optimizing queries and indexes to keep response times fast as data grew.
- Used Celery with Redis for background task processing - things like sending emails, generating reports, and handling scheduled jobs.
- Wrote unit and integration tests using pytest and Django's test framework, keeping core business logic covered and regressions in check.
- Containerized applications with Docker and contributed to CI/CD pipelines for automated testing and deployment.
- Integrated third-party APIs and services (payment gateways, cloud storage, etc.) into backend workflows.
- Collaborated with frontend developers to design clean API contracts, making integration smoother on both ends.

Symph

10/2019 - 04/2020

Senior Full Stack Developer

Cebu City, Philippines

- Developed and optimized e-commerce platforms using JavaScript and TypeScript with React, Angular, Vue, and Node.js, alongside C#, Python, Java, Ruby, and Go across client-preferred technology stacks.
- Architected database designs with MongoDB, MySQL, and PostgreSQL to support RESTful APIs and full stack application development.
- Implemented GraphQL queries effectively, leveraging the Apollo GraphQL library.
- Developed complex data streams and handled asynchronous events using RxJS.
- Created interactive data visualizations using D3.js.
- Possess a strong understanding of API security and OAuth, ensuring secure and reliable authentication and authorization in applications.
- Leveraged RabbitMQ and Kafka for efficient message queuing and real-time data processing.
- Employed Git for version control and Jenkins for CI/CD pipeline management.

- Experienced in Kubernetes for containerized app deployment, alongside using Terraform for AWS automation, ensuring scalable, reliable, and streamlined operations.
- Designed systems for scalability and resilience using AWS services like ECS, S3, DynamoDB, and Lambda, enabling more efficient operations.
- Covered integration, unit, and snapshot test cases using Jest, Mocha, Chai, Enzyme, and react-test-renderer, achieving 95% test coverage.
- Applied Google Optimize for A/B testing to enhance the homepage layout.
- Applied Agile/Scrum methodologies by conducting regular sprint planning sessions and retrospectives to streamline project delivery.
- Demonstrated strong problem-solving skills by quickly adapting to various frameworks, showcasing my ability to navigate and excel in diverse technical environments.
- Collaborated with cross-functional development teams to customize and deploy API solutions tailored to specific client requirements, improving service efficiency and client satisfaction.

Technology Elite

03/2018 - 08/2019

Front End Developer

Pampanga, Philippines

- Developed and maintained FINTECH web applications using React and Angular.
- Modernized legacy PHP projects by converting them to MERN & MEAN Stack codebases.
- Integrated RESTful APIs into the frontend using React and Angular, ensuring efficient data retrieval and seamless user interactions.
- Executed Redux, MobX and NgRX for efficient state management.
- Worked on implementing the real-time chat feature using WebSocket.
- Improve maintainability, readability and scalability using Custom Hook and High Order Components.
- Developed responsive and pixel-perfect web pages using SASS and LESS for styling.
- Utilized Jest, Jasmine, Cypress, Karma for unit testing, ensuring high quality and reliability, following Test Driven Development (TDD) approach.
- Collaborated with cross-functional teams to align technical implementations with business goals, highlighting teamwork and communication.
- Stayed updated with industry trends, showcasing a commitment to continuous learning and adaptability.

EDUCATION

University of Luzon

Computer Science

Dagupan City, Pangasinan

Skills

- **Frontend:** React, NextJS, VueJS, JavaScript, TypeScript, Redux, Angular, React Native
- **Backend:** Python, Flask, Django, FastAPI, PHP, Laravel, CakePHP, NestJS, Express.js, Java, C#
- **Databases:** MySQL, MongoDB, PostgreSQL, Prisma
- **Cloud & DevOps:** Docker, GitHub
- **APIs & Architecture:** GraphQL
- **CMS & Web Platforms:** WordPress
